

Darshnoor Kaur

Cybersecurity and Security Engineering Student

Mohali, Punjab, India | kaurdarshnoor30@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

B.Tech Computer Engineering student building tested defensive-security tools for phishing detection, network monitoring, explainable risk scoring, and SOC workflows. Published three public security projects with CI and 50+ automated tests. Seeking cybersecurity, SOC, detection engineering, cloud security, or security engineering internships.

EDUCATION

Amity University Punjab, B.Tech Computer Engineering Sep 2024 - Sep 2028
Mohali, Punjab | CGPA: 7.61/10 | Latest SGPA: 8.33/10

Ryan International School - Class XII, PCM: 80.4% 2024 | **Vivek High School** - Class X: 94.2% 2022

SELECTED SECURITY PROJECTS

SentinelScan - Phishing URL Detection Platform [\[GitHub\]](#) *Python, FastAPI, React, Random Forest*

- Built an end-to-end platform that combines 31 engineered URL and domain features with SSL, DNS, WHOIS, reputation, and optional threat-intelligence signals.
- Implemented explainable risk fusion, three verdict classes, API-key authentication, scan history, and dashboard analytics; the selected model recorded 99.84% accuracy on the project evaluation split, with real-world limitations documented.

SentinelNet - Explainable Network Threat Detection and SOC Console [\[GitHub\]](#) *Python, Scapy, Streamlit, Plotly, Pandas*

- Built a privacy-aware packet-metadata pipeline with typed service rules, normalized CSV telemetry, and rolling detection for 10 unique destination ports within 60 seconds.
- Delivered an analyst-focused dashboard with severity and source filters, priority-sorted alerts, timelines, auto-refresh, and CSV export; added Ruff, Pytest, coverage gates, and a Python-version CI matrix.

Explainable Phishing Email Detector [\[GitHub\]](#) *Python, Tkinter, CLI, Pytest*

- Developed an offline, deterministic triage engine that detects social-engineering language and URL-structure indicators, then returns a normalized 0-100 risk score with weighted evidence and next steps.
- Packaged the engine for reusable Python, CLI, JSON, and desktop-GUI workflows with typed code, import-safe entry points, automated tests, CI, security guidance, and no runtime network requests.

EXPERIENCE AND LEADERSHIP

Web Development Intern, 3Skill Training 2 months, 2026

- Completed a two-month, project-based web-development internship; applied academic concepts to practical technical projects and strengthened structured problem-solving.

Home Tutor, Self-Employed - Mohali and Chandigarh Jun 2024 - Present

- Teach 10+ CBSE and ICSE students across Mathematics, Science, English, and Computer Science; create structured learning plans and explain complex concepts clearly.

Smart India Hackathon 2025: Advanced to Round 3 with a Smart Tourist Safety Monitoring solution in the Travel and Tourism track.

TECHNICAL SKILLS

Security: Phishing analysis, network traffic inspection, detection logic, alert triage, SOC workflows, log analysis, risk scoring, incident-response, IAM, and data-security fundamentals

Programming: Python, JavaScript, Java, C++, C, SQL

Frameworks and Data: FastAPI, React, Vite, Streamlit, Scapy, SQLAlchemy, SQLite, Pandas, Plotly, Pytest

Security and Cloud Tools: Wireshark, Nmap, Burp Suite, Kali Linux, Git, GitHub Actions, AWS IAM, EC2, DynamoDB

Languages: English (fluent); Hindi and Punjabi (native/bilingual); German (elementary)

SELECTED CREDENTIALS

AWS Academy Graduate - Cloud Developing 2026

AWS Academy Graduate - Cloud Foundations 2026

Cisco Networking Academy - Introduction to Cybersecurity 2026

IBM SkillsBuild - Getting Started with Cybersecurity 2026

Forage - Cybersecurity simulations (PwC US, Datacom, Mastercard, Commonwealth Bank, and Tata) 2026

ISC2 Candidate status May 2026 - May 2027
