

Darshnoor Kaur

Cybersecurity and Security Engineering Student

Mohali, Punjab, India | kaurdarshnoor30@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

B.Tech Computer Engineering student building tested defensive-security tools for firewall auditing, phishing detection, network monitoring, explainable risk scoring, and SOC workflows. Published four public security projects with CI and 89 automated tests. Seeking cybersecurity, SOC, detection engineering, cloud security, or security engineering internships.

EDUCATION

Amity University Punjab, B.Tech Computer Engineering Sep 2024 - Sep 2028
Mohali, Punjab | CGPA: 7.61/10 | Latest SGPA: 8.33/10

Ryan International School - Class XII, PCM: 80.4% 2024 | **Vivek High School** - Class X: 94.2% 2022

SELECTED SECURITY PROJECTS

FirewallGuard - Explainable Firewall Rules Auditor [\[GitHub\]](#) *Python, iptables, Streamlit, ReportLab*

- Built a deterministic auditor for JSON and iptables-save inputs that normalizes IPv4/IPv6 CIDRs, ports, interfaces, connection states, and default policies before analysis.
- Detects public administrative and database exposure, permissive policies, duplicates, and conservative shadowing; delivers CLI gates, dashboard exports, and PDF/JSON evidence with 44 tests and 91% coverage.

SentinelScan - Phishing URL Detection Platform [\[GitHub\]](#) *Python, FastAPI, React, Random Forest*

- Built an end-to-end platform that combines 31 engineered URL and domain features with SSL, DNS, WHOIS, reputation, and optional threat-intelligence signals.
- Implemented explainable risk fusion, three verdict classes, API-key authentication, scan history, and dashboard analytics; the selected model recorded 99.84% accuracy on the project evaluation split, with real-world limitations documented.

SentinelNet - Explainable Network Threat Detection and SOC Console [\[GitHub\]](#) *Python, Scapy, Streamlit, Plotly, Pandas*

- Built a privacy-aware packet-metadata pipeline with typed service rules, normalized CSV telemetry, and rolling detection for 10 unique destination ports within 60 seconds.
- Delivered an analyst-focused dashboard with severity and source filters, priority-sorted alerts, timelines, auto-refresh, and CSV export; added Ruff, Pytest, coverage gates, and a Python-version CI matrix.

EXPERIENCE AND LEADERSHIP

Web Development Intern, 3Skill Training 2 months, 2026

- Completed a two-month, project-based web-development internship; applied academic concepts to practical technical projects and strengthened structured problem-solving.

Home Tutor, Self-Employed - Mohali and Chandigarh Jun 2024 - Present

- Teach 10+ CBSE and ICSE students across Mathematics, Science, English, and Computer Science; create structured learning plans and explain complex concepts clearly.

Smart India Hackathon 2025: Advanced to Round 3 with a Smart Tourist Safety Monitoring solution in the Travel and Tourism track.

TECHNICAL SKILLS

Security: Firewall policy auditing, least-privilege analysis, phishing analysis, network traffic inspection, detection logic, alert triage, SOC workflows, log analysis, risk scoring, incident response, and IAM

Programming: Python, JavaScript, Java, C++, C, SQL

Frameworks and Data: FastAPI, React, Vite, Streamlit, Scapy, SQLAlchemy, SQLite, Pandas, Plotly, Pytest

Security and Cloud Tools: iptables, Wireshark, Nmap, Burp Suite, Kali Linux, Docker, GitHub Actions, AWS IAM, EC2, DynamoDB

Languages: English (fluent); Hindi and Punjabi (native/bilingual); German (elementary)

SELECTED CREDENTIALS

AWS Academy Graduate - Cloud Developing 2026

AWS Academy Graduate - Cloud Foundations 2026

Cisco Networking Academy - Introduction to Cybersecurity 2026

IBM SkillsBuild - Getting Started with Cybersecurity 2026

Forge - Cybersecurity simulations (PwC US, Datacom, Mastercard, Commonwealth Bank, and Tata) 2026

ISC2 Candidate status May 2026 - May 2027
